About the house:

Customising Our designs and the Approval Process:

All our designs are intended to be modified to fit your site and your site specific design requirements where practical and with regards to compliance with the NSW General Housing Code for Complying Development.

The GHC is a set of design guidelines that if complied with automatically get planning and building approval.

Layout description:

F-NS2 Model is a 2 storey house that can be placed on a flat, narrow site with a minimum of 306.5 m² area and a 12.2m minimum width.

The ground floor is comprised of the living areas, such as the living room, dining room, a wide, open-space kitchen, a flexible bedroom and a bath. A garage for 2 cars and service spaces such as Laundry and Storage CPD's are also part of this floor.

It opens up to a full-width terrace, and to a potential pool that can be enclosed on 3 sides offering privacy and comfort.

The bedrooms, the family room, study, a bath and an ensuite are hosted on the first floor.

All rooms have generous windows and are very well ventilated. The larger openings are protected by extruded slabs or louvers for shade in the hot days of summer.
